CHOOSE IN 30 SECONDS

First printer, tight budget?

A1 Mini (\$219) or **A1** (\$299).
Open-frame, easy, multi-color optional.

Most people, best value?

A1 (\$299) for open. Enclosed:
P1S (\$399) is the bargain, **P2S** (\$549) the newer pick.

Enclosed & engineering?

P2S (\$549) to start, **X2D** (\$649)
for a heated chamber + dual nozzle.

Big, fast, pro?

H2S/H2D for volume & speed;
H2C for 7 materials (Vortek).

THE FULL LINEUP

Open frame · budget & beginner

MODEL	PRICE	BUILD VOLUME	CHAMBER	BEST FOR
A1 Mini	\$219 \$299	180 × 180 × 180	Open	Cheapest way in, small prints
A1 Best value	\$299 \$399	256 × 256 × 256	Open	Most people, multi-color via AMS Lite
A2L New	\$469	330 × 320 × 325	Open	Biggest A-series volume, optional cutter

Enclosed · materials & versatility

P1S	\$399 \$699	256 × 256 × 256	Enclosed	Proven workhorse, cheapest enclosure
P2S	\$549	256 × 256 × 256	Enclosed	Best-value enclosed, ABS/ASA
X2D	\$649	256 × 256 × 260	Heated	Dual nozzle, active chamber, X1C successor

H-series · large & professional

H2S	\$1,199 \$1,249	340 × 320 × 340	Heated	Large, fast engineering prints
H2D	\$1,549 \$1,749	350 × 320 × 325	Heated	True IDEX dual nozzle, LiDAR, 40W laser
H2C	\$2,199 \$2,399	305 × 320 × 325	Heated	Vortek: 7 materials, no purge tower
H2D Pro	\$3,799	350 × 320 × 325	Heated	Enterprise, hardened tooling

All H2 models (S/D/C) take an optional laser + cutting module: 3D printing plus engraving/cutting. H2S is 10W-only; H2D and H2C also support the 40W module.

Discontinued (buy the successor): X1C (\$1,199) → X2D · X1E (\$2,499, enterprise, EOL) · P1P (\$699) → P1S. Restocks only.

GOOD TO KNOW BEFORE YOU BUY

- **Multicolor needs an AMS.**
AMS Lite for the A1/A1 Mini, AMS 2 Pro for P/X/H-series, AMS HT for high-temp. Cheapest bundled as a "Combo".
- **Prices swing a lot.**
US list moves with tariffs and sales (anniversary, Prime Day, Black Friday). Wait for a drop if you can.
- **Buy official channels.**
Bambu Lab store or authorized sellers. Grey-market imports can void warranty and firmware support.
- **It's one ecosystem.**
All run Bambu Studio + Handy app. Any filament works; Bambu RFID spools auto-load their settings.
